VOCATIONAL EDUCATION

DEPARTMENT OF RENEWABLE ENERGY TECHNOLOGIES

It is impossible for facilities, animals and humans to consume renewable energy permanently. While fossil fuels are theoretically renewable considering a very long timeline, they are in danger of being completely depleted in the near future as a result of being abused.

Subbranches

- Renewable Energy Systems

Education and Career Opportunities

Those who succeed at the end of the "Higher Education Institutions Exam" after graduating vocational high schools can continue undergraduate programs or related departments of vocational schools of higher education.

Professional staff, who completed their education and gained the necessary qualifications in business life, can pursue their career in businesses related to wind power plants and solar power plants.

Candidates who graduated from the related fields/branches of vocational and technical high schools are placed in special quotas reserved for them. The following undergraduate programs are available for them in the faculties of technology.

- *Electrical and Electronics Engineering*
- *Electronics and Communication Engineering*
- *Energy Systems Engineering*
- *Mechanical Engineering*
- *Mechanical and Manufacturing Engineering*

DEPARTMENT OF ELECTRICAL AND ELECTRONIC TECHNOLOGIES

Subbranches

- Industrial Maintenance-Repair

Education and Career Opportunities

Industrial maintenance-repair staff, depending on the working area of the enterprise (paper, food, textile, automotive, medicine, etc.) and the state of the machinery park in the enterprise, works with aprons, helmets, gloves, indoors or outdoors, if necessary, in narrow spaces.

Visual and sound systems technical service staff focuses on the maintenance and the repair of radio and television, stereo and CD, video, tuner, remote control and spare parts.

In addition to these, the electronical sound systems in the automobiles and the maintenance-repair of radios and stereos are carried by radio and TV staff. They work indoors under suitable conditions. In addition, cinemas, theaters, concert halls, stadiums, open-air theaters can also be their working areas.

Candidates who graduated from the related fields/branches of vocational and technical high schools are placed in special quotas reserved for them. The following undergraduate programs are available for them in the faculties of technology.

- *Forensic Informatics Engineering*
- *Computer Engineering*
- *Information Systems Engineering*
- *Biomedical Engineering*
- *Electrical and Electronics Engineering*
- *Electronics and Communication Engineering*
- *Industrial Design Engineering*
- *Energy Systems Engineering*
