ACADEMIC

*"Easy knowledge may
be forgotten. The
knowledge you put
effort on is
unforgettable."*

**You can
reveal your
potential by
recognizing
and using it.**

IN OUR SCHOOL

Anatolian Technical Program (ATP) is being implemented and five years of education is given at our school with a foreign language preparation. Maths, Physics, Chemistry and Biology courses are the same as the Anatolian High School curriculum at every grade level. In 12th grade all courses are academic courses.

Our students are supported according to their interests with;

- Coding Training,
- Korean as a Second Foreign language (optional)
- Personal Development Certificates
- Project Based Trainings
- Supporting and Training Courses

IN THE FOOTSTEPS OF CEZERI...

In today's world where science and technology are advancing rapidly, it is necessary to be the producer of the information and the leader of technology rather than a follower in order to exceed the existence, stay strong and have a word in the construction of future.

As Cezeri Green Technology Vocational and Technical Anatolian High School, we are able to meet the public's increasing search for information. We would like to fully fulfill our responsibility of education, training and serving to public. In accordance with our values, our main goal is to raise honest, impartial, fair, loveful, communicatory, problem solver, innovative and humanistic individuals.

**“I have seen that every
technical science that hasn't
been turned into practice is
between right and wrong.”**

Ebul-İs El Cezeri
